

CALLAN MARINE

EXPERIENCE, RESOURCES AND KNOWLEDGE

Callan Marine, Ltd. has the experience, resources and knowledge to fulfill the requirements of our clients in the marine and coastal construction industry. As a Gulf Coast-based heavy civil and marine contractor, Callan Marine is strategically located to provide a full breadth of services.

- Callan Marine's fleet of dredges and support equipment offers a comprehensive solution for any assignment – from routine waterway and terminal maintenance projects to major construction/expansion projects.
- The design and construction of bulkhead and dock facilities, dredge containment areas, levees and wetland creation and restoration makes Callan Marine one of the most unique marine and coastal construction firms in the industry.
- Callan Marine's home terminal is centrally located on the Galveston Ship Channel and is accessible by water, road and rail.
- Callan Marine has both public and private sector clients and works in cooperation with other marine construction providers.

Callan Marine's fleet is comprised of cutter suction and mechanical dredges, barges and boats as well as a variety of cranes and draglines such as three 250 ton Manitowoc 4600 cranes. The fleet also includes various hydraulic excavators, loaders, bulldozers, backhoes and specialized support vessels. The inventory of equipment helps us to provide our customers with the capability to respond to any specialized situation.
